Objective

Enthusiastic and detail-oriented Java Developer seeking an Entry-Level Position to leverage expertise in Java, Spring Boot, and full-stack development. Passionate about solving real-world problems through efficient coding and scalable software solutions.

Technical Skills

- **Languages**: Java, SQL, HTML5, CSS3, JavaScript, React, Angular.
- **Frameworks / Libraries:** Spring Boot, Microservices, Hibernate, Spring MVC, J2EE, JDBC, REST APIs.
- **Databases:** MySQL, PostgreSQL, Oracle.
- **Tools:** IntelliJ IDEA, Eclipse IDE, Spring Initializer, Git, Visual Studio Code, Docker, Junit.
- **Concepts:** Oops, Data Structures, Algorithms, DBMS**.**
- **Soft Skills:** Leadership, Problem-Solving, Collaboration, Analytical Skills, Communication Skills.

Experience

Satya Info Tech Company *January 2024- June 2024*

Java Developer Intern GitHub *Hyderabad*

- Designed and developed a comprehensive **Employee Management System** using **Spring Boot**, Thyme leaf, and MySQL.
- Implemented a robust user interface with features such as employee listing, creation, editing, and deletion.
- Reduced employee data management time by **40%** through automation and optimization.
- Utilized **MySQL** database to store and manage employee data, ensuring efficient data retrieval and manipulation.
- Improved data accuracy by **25%** through validation and verification mechanisms.

Technical Projects

Airline Reservation System (SkyWings) | Spring Boot, MySQL, REST APIs, HTML5, JS| *February–2026*

- Developed a full-stack Airline Reservation System enabling users to search, view, and book flights based on source, destination, and travel date.
- Designed and implemented **RESTful APIs** using **Spring Boot**, integrating with **MySQL** for efficient management of flight, user, and Booking data.
- Built a responsive frontend using HTML, Tailwind CSS, and JavaScript with dynamic search functionality.
- Implemented robust backend validation and business logic to ensure data integrity and prevent invalid operations.
- Leveraged AI-assisted tools (e.g., **ChatGPT**, **Grok**, **Blackbox AI**) to accelerate frontend development, enabling greater focus on backend architecture and API design.

Banking Web Development (SDFC Bank) | Spring Boot, MySQL, REST APIs, HTML5, JS| *November–2025*

- Developed a secure full-stack Banking Web Application using Spring Boot and Spring Security with JWT-based authentication.
- Designed and implemented RESTful APIs for account management and transaction processing with optimized database queries, improving performance by **30%**.
- Built a responsive and interactive frontend using HTML, Tailwind CSS, and JavaScript with modern UI components and smooth animations.
- Integrated frontend with backend services to deliver a seamless and scalable digital banking experience.

Car Rental Web Development (| Spring Boot, MySQL, REST APIs, HTML5, JS| *August-2024*

- Developed a Car Rental Web Application using Spring Boot, RESTful APIs.
- Implemented Secure Login, Registration, and Account Management Functionalities using Spring Security.
- Achieved a **40%** reduction in data entry time by implementing automated employee onboarding processes.

Breast Cancer Detection using Machine Learning *Major Project- BTech 2023*

- Participated in Developing a Machine Learning Solution for Breast Cancer Detection, focusing on data handling and preprocessing.

Education

Bachelor of Technology in Computer Science Engineering *Hyderabad*

Siddhartha Institute of Technology and Sciences *June 2019 – Dec 2023*
